Course Objectives: As a result of the participation in this activity, participants should be able to:

1. Define domestic violence and its impacts on health care.
2. Cite general prevalence of domestic violence nationally and statewide.
3. Identify risk factors and describe screening procedures for determining whether a patient has a history of being either a victim or a perpetrator of domestic violence.
4. Provide such patients with information on, or how to refer such patients to, resources in the local community.
5. Understand and comply with mandatory reporting requirements.
