Course Objectives: As a result of the participation in this activity, participants should be able to:

1. Discuss and review basic facts on HIV and exposure risks to health care providers and workers.
2. Describe Florida's HIV confidentiality and HIV testing statutes.
3. Articulate the standard precautions health care providers and workers should take to prevent the transmission of HIV.
4. Define HIV transmissions precautions specific to practice areas.
5. Appreciate the fundamentals of post-HIV exposure management in the health care setting.

6. Apply a specific case example of how HIV exposure to a patient interrelated with the need to disclose the incident under Florida law.
