COVERAGE RESTRICTION & INFORMATION

Healthcare professional liability protection provided by the above-named self-insurance program (SIP) is restricted to incidents and claims arising out of patient care rendered within the scope and course of your employment/appointment with the BOT.

For questions related to medical malpractice liability protection, please call 352-273-7006, or 844-MY FL SIP, or visit our website at: MY FL SIP.org, or specifically <https://flbog.sip.ufl.edu/liability-protection-afforded>.

PRIVATE PHYSICIANS: When educating, training, and supervising the clinical services performed by BOT fellows, residents, and/or students, private physicians have a limited personal immunity as set forth in Section 768.28(9), Florida Statutes. The limited personal immunity of Section 768.28(9), Florida Statutes, protects private physicians from claims of vicarious liability (respondeat superior) arising from alleged negligent acts or omissions of the BOT fellows, residents, and students. The exclusive remedy for alleged negligent acts or omissions of BOT fellows, residents, and students is an action against the BOT. NOTE: Patient care personally provided by private physicians does NOT trigger the limited immunity of Section 768.28(9), Florida Statutes. A private physician is solely responsible for patient care provided and must individually satisfy Florida's professional liability financial responsibility requirements applicable to physicians.

INCIDENT REPORTING REQUIREMENTS

Provider Name:

Non-Delegable Responsibility:

Each individual who is an employee or agent of a protected entity of the SIP has a non-delegable responsibility to report to the SIP any occurrence or circumstance which has the potential of becoming a liability claim against you and/or your employer and/or the facility at which the circumstance occurred.

Circumstances Required to be Reported:

Recognizing that no definition of a reportable event will cover all circumstances and that it is often the magnitude of an injury rather than the actual quality of the care delivered that causes malpractice claims to be filed, the following conditions or incidents are among those which must be reported if they manifest while the patient is undergoing treatment, therapy, or surgery:

1. Total or partial loss of limb, or loss of the use of a limb
2. Sensory organ or reproductive organ impairment
3. Any injury to any part of the anatomy not undergoing treatment
4. Disability or disfigurement
5. Any assertion by a patient or patient's family that he/she has been medically injured
6. Misdiagnosis of a patient's condition resulting in mortality or increased morbidity
7. Any birth of a term baby that is stillborn or expires shortly after delivery
8. Any shoulder dystocia resulting in a fracture or other injuries
9. Any assertion by the patient/family that no consent for treatment (medical/surgical) was given
10. Any assertion or evidence that the patient was sexually abused, raped, or otherwise sexually assaulted
11. Medication errors leading to injury, death, or higher level of care
12. Retained foreign body incidents
13. Wrong site, wrong patient, wrong procedure
14. Any incident that results in an unexpected death, brain or spinal damage, or any other injury not referenced above
15. Any other unexpected adverse condition or outcome that you feel could result in a claim

The best guideline to follow for determination of whether a circumstance is reportable is that of common sense, sustained by the ever present awareness of the possibility of a claim. The standard practice should be that **when in doubt, report.**
